

A loan for Liberty and for Liberty alone

After the Horrors of Belgium

Would you care to risk your wife, your mother, your sister, your children, your home or your country to the mercies of the barbarian hosts who have scourged Europe and are attempting world domination?

The United States must win this great war that your home, your country and your loved ones may be protected, and that the principles of liberty, humanity, justice and civilization shall not perish.

An immense amount of money will be needed to guarantee victory for the armies of American boys who will fight the cause of right. Ships of war and commerce must be built, American troops must be fed, clothed and supplied with an abundance of arms and ammunition that victory over our enemies may be assured.

The more great guns we build and send To the battle front the more lives of American boys will be saved. It is essential that the enemies of the nation be crushed by the superiority of our armament.

It is our patriotic duty to see that the United States Government has ample funds with which to win speedily this victory for permanent peace, prosperity, humanity and liberty by purchasing as many Liberty Bonds as we can afford.

Liberty Bonds are backed by all of the wealth and resources of this great Nation. They pay interest at the rate of $4\frac{1}{4}$ per cent. per annum. If later issues of bonds carry a higher rate you may exchange your Liberty Bond for them.

Liberty Bonds may be had in denominations of \$50 and up, on liberal terms of payment. They are the safest investment you can make.

Buy a Liberty Bond at once and give the United States Government the patriotic support it needs to win a decisive victory over enemies who are threatening to ravage the earth.

Inscribe your name on the Nation's roll of honor of owners of Liberty Bonds. Ask any bank or trust company for detailed information. Do it at once.
